

Shameer Hassan

Cyber Security Intern Candidate | Abu Dhabi / Islamabad

+971 509009817 | +92 3335363221 | shameerhassan4273@gmail.com

Professional Summary

Motivated and detail-oriented Cyber Security student with hands-on experience in web development, secure application development, and threat detection systems. Completed professional internship training at e& Etisalat in Abu Dhabi, gaining exposure to enterprise telecommunications environments and system operations. Skilled in C++, JavaScript, React, Node.js, MongoDB, SQL, and Python with a strong foundation in Object-Oriented Programming, debugging, and cybersecurity concepts. Passionate about identifying vulnerabilities, improving system security, and building efficient software solutions.

Experience

Cyber Security Intern – e& Etisalat | Abu Dhabi

- Collaborated with professionals in a telecommunications environment to gain exposure to cybersecurity operations and enterprise infrastructure.
- Observed and supported system analysis, troubleshooting, and operational workflows during a 3-week internship program.
- Strengthened understanding of network security concepts, system monitoring, and technical problem-solving within large-scale IT environments.

Projects

Full-Stack Web Applications

Technology Stack: React, Node.js, MongoDB, SQL, jQuery

- Architected and developed multiple full-stack web applications independently using React, Node.js, MongoDB, SQL, and jQuery.
- Optimized backend database functionality through efficient SQL integration, ensuring stable and accurate application performance.
- Debugged and enhanced application workflows, achieving fully functional project delivery and earning full academic marks.

Anti-Phishing Browser Extension

Technology Stack: C++, JavaScript

- Developed a browser-based cybersecurity extension capable of identifying phishing websites and detecting potentially malicious activity.
- Implemented threat-detection logic using C++ and JavaScript to improve user protection against unsafe web environments.
- Enhanced proactive security measures by analyzing suspicious website behavior before user interaction.

Advanced Cafe Management System

Technology Stack: C++

- Engineered a role-based cafe management system using Object-Oriented Programming principles in C++.
- Designed authentication and workflow modules for students, faculty, and administrators with separate operational privileges.
- Integrated features including order management, complaints handling, stock management, and scheduled ordering functionality.

Personal Profile Website

Technology Stack: Python, HTML, CSS

- Designed and developed a responsive five-page personal portfolio website with a consistent UI/UX theme.
- Implemented navigation systems, authentication panels, and interactive layouts to improve user experience.
- Demonstrated front-end development creativity through cohesive branding, structured layouts, and responsive design.

Skills

Programming Languages: C++, Python, JavaScript, SQL

Web Technologies: React, Node.js, MongoDB, jQuery, HTML, CSS

Cybersecurity: Threat Detection, Phishing Detection, System Analysis, Secure Development

Tools: VS Code, Visual Studio, Ubuntu, MS Word, MS Excel, PowerPoint

Education

FAST National University of Computer and Emerging Sciences, Islamabad

Bachelor's in Cyber Security

The International School of Choueifat, Khalifa City A, Abu Dhabi
A Levels / HSSC

Extra-Curricular Activities

- Operations Member – NaSCon'23 and NaSCon'24
